

Model 7205 Universal Programmable Smart Wi-Fi Thermostat

Leave this Setup Guide
with thermostat.

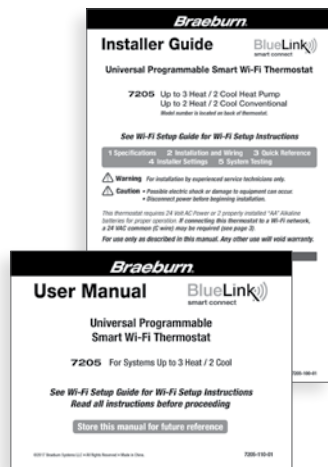

7205-105-02

1 Wire and Install Thermostat

- Properly wire and configure thermostat. Refer to the Installer Guide.
- Refer to the User Manual for programming and maintenance.

NOTE: Wi-Fi works without common (C) wire on most systems; requires common on Heat Pump, Heat Only or Cool Only Systems

2 Set-Up for Connection

Before beginning setup you will need to:

- Know your Wi-Fi network name and password
- Have a valid e-mail address
- Get the FREE app

Apple® Devices:

Download the BlueLink Smart Connect® application from the **Apple® App Store**

Android™ Devices:

Download the BlueLink Smart Connect® application from the **Google Play Store**

Desktop Computer:

Once connected, you can access the app on a desktop PC by visiting bluelinksmartconnect.com/bluelink.

3 Login and Register

3.1 Open the BlueLink Smart Connect App. Select **REGISTER** and enter a valid e-mail address.

3.2 Enter the thermostat serial number. You can locate this number on the back of the thermostat or on the enclosed thermostat registration card.

NOTE: If you removed the thermostat to locate the serial number, make sure to reconnect it before selecting **ENTER**.

3.3 Complete the remaining registration screens. Once you reach the Create Account screen, select **REGISTER**.

4 Enter Network Information (works with 2.4 GHz networks only)

4.1 Enter your network name (SSID) and password, select **ENTER**.

NOTE: The network name and password are case sensitive fields.

The application will now instruct you to put the thermostat into Wi-Fi connect mode.

5 Complete Setup Process

Follow the Prompts within the App to:

- Enable Wi-Fi on thermostat
- Connect to thermostat
- Complete setup

Adding Additional Thermostats

Once the app is set up and registered, it's easy to add additional thermostats to your existing account.

1. Log into the app
2. Select "Update Thermostats"
3. Select "Add New"
4. Follow the prompts in the app to add additional thermostats.

Changing Your Wi-Fi Settings

First Clear Your Thermostat Wi-Fi Settings

1. Press and hold the **RETURN** button for 4 seconds.
2. The display will change showing the first User Option.
3. Press **RETURN** until you see the word WIFI in the display.
4. Press the **Λ** button until WIFI CL appears.
5. Press **RETURN** to exit and clear all Wi-Fi settings.

Then Update Your App Settings

1. Open the app and select **Update Account**.
2. Enter your account password.
3. Select **Wi-Fi Settings**.
4. Select the thermostat you wish to change.
5. Choose **WI-FI Network** or **WI-FI Password** and select Enter.
6. Update the information and select **Enter**.

NOTE: To complete setup, follow the instructions in the app.

Record Network Information for Future Reference

Network Name (SSID) _____

Network Password _____

Thermostat Serial Number # _____

You may need this information later or if calling for support.
